Re: Use of Tailings as Fill at the Proposed Gold Rush Golf Development

Dear Diane,

This is an update to previous documents Walker & Associates has submitted concerning the use of tailings for fill material at various places on the proposed Gold Rush Golf development. Because the Department of Toxic Substances Control will be requiring a Preliminary Endangerment Assessment (or equivalent), the use of tailings as fill on site is now unlikely.

Please do not hesitate to contact me with any questions or comments regarding this issue. We appreciate the opportunity to be of service.

Sincerely,

William J. Walker, Ph.D.
Principal Geochemist
